Aberdeen Global - Emerging Markets Equity Fund

Important information

Risk factors you should consider before investing:

- The value of shares and the income from them can go down as well as up and you may get back less than the amount invested.
- Investing globally can bring additional returns and diversify risk. However, currency exchange rate fluctuations may have a positive or negative impact on the value of your investment.
- Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries. This may mean your money is at greater risk.

Other important information:

The Morningstar Analyst Rating for Funds is a forward-looking analysis of a fund. Morningstar has identified five key areas crucial to predicting the future success of a fund: People, Parent, Process, Performance, and Price. The pillars are used in determining the Morningstar Analyst Rating for a fund. Morningstar Analyst Ratings are assigned on a five-tier scale running from Gold to Negative. The top three ratings, Gold, Silver, and Bronze, all indicate that our analysts think highly of a fund; the difference between them corresponds to differences in the level of analyst conviction in a fund's ability to outperform its benchmark and peers through time, within the context of the level of risk taken over the long term. Neutral represents funds in which our analysts don't have a strong positive or negative conviction over the long term and Negative represents funds that possess at least one flaw that our analysts believe is likely to significantly hamper future performance over the long term. Long term is defined as a full market cycle or at least five years. Past performance of a security may or may not be sustained in future and is no indication of future performance. Source: Ex-post Ongoing charges Aberdeen Asset Managers Limited as at 30 September 2016.

^AThe current initial charge applied and due to the Fund is 2% in respect of new subscriptions into the relevant classes. This is an introductory rate for the benefit of the Fund, set as a measure to control capacity, and could potentially increase up to the disclosed maximum stated above at any time. Such initial charge is applied in addition to, or in place of, any other initial charge already applied, such that investors already subject to an initial charge of 2% or above on their subscriptions will continue to incur the same level of initial charge but 2% of that charge shall be payable to the Fund (i.e. where a charge of 2% or above is already levied, such charge is not increased). Please refer to www.aberdeen-asset.com for further information.

^BThe Ongoing Charge Figure (OCF), is the overall cost shown as a percentage of the value of the assets of the Funds. It is made up of the Annual Management Charge (AMC) of 1.75% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the Funds. The Ongoing Charges figure can help you compare the annual operating expenses of different Funds.
