

Aberdeen Global II - Asian Bond Fund

Class I - 2 Acc

Performance Data and Analytics to 28 February 2018

For Professional Investors Only - Not For Use By Retail Investors

Summary investment objective

To achieve a combination of income and growth by investing mainly in bonds (which are like loans that pay a fixed or variable rate of interest) issued by governments, companies and other large organisations in Asian countries. The bonds will be of any credit quality, as defined by international agencies that provide such ratings. The Fund is intended for investors who are willing to accept a high level of risk.

Cash includes cash at bank, outstanding settlements, call account cash, fixed deposits, cash used as margin and profit/losses on both derivative positions and forward currency contracts. Where bonds are split rated between two or more of S&P, Moody's and Fitch, the data shown takes a more conservative approach, splitting lower. This may not be consistent with the arrangement agreed in the prospectus, which may detail taking a higher rating where there is a split. In the absence of any agency ratings an internal Fund Manager rating may be applied. The benchmark shown reflects ratings from S&P, Moody's and Fitch only. This may differ from the ratings used by the benchmark provider.

Figures may not always sum to 100 due to rounding.

^eThe Distribution Yield reflects the amounts that may be expected to be distributed over the next twelve months as a percentage of the mid-market share price of the fund as at the date shown. The Underlying Yield reflects the annualised income net of expenses of the fund (calculated in accordance with relevant accounting standards) as a percentage of the mid-market share price of the fund as at the date shown. Both yields are based on a snapshot of the portfolio on the month-end date and are not guaranteed. They do not include any initial charges and Investors may be subject to tax on distributions.

^fThe Ongoing Charge Figure (OCF), is the overall cost shown as a percentage of the value of the assets of the Funds. It is made up of the Annual Management Charge (AMC) of 0.70% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the Funds. The Ongoing Charges figure can help you compare the annual operating expenses of different Funds.

Important information

Risk factors you should consider before investing

- The value of investments and the income from them can go down as well as up and you may get back less than the amount invested.
- Investing globally can bring additional returns and diversify risk. However, currency exchange rate fluctuations may have a positive or negative impact on the value of your investment.
- Bonds are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may not be able to pay the bond income as promised or could fail to repay the capital amount used to purchase the bond. Where a bond market has a low number of buyers and/or a high number of sellers, it may be harder to sell particular bonds at an anticipated price and/or in a timely manner.
- Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries. This may mean your money is at greater risk.
- This Fund can use derivatives in order to meet its investment objectives. This may result in gains or losses that are greater than the original amount invested.
- Contingent convertible bonds can automatically convert into shares or be written down if the financial strength of the issuer falls in a certain way. This may result in substantial or total losses of the bond value.
- The Fund may invest directly or indirectly in Chinese domestic securities markets via various channels, which involves additional risks as further described in the Fund's Prospectus under "Investing in China".
