The Fund's use of leverage exposes the Fund to additional risks, including the risk that the costs of leverage could exceed the income earned by the Fund on the proceeds of such leverage. Additionally, in the event of a general market decline in the value of the Fund's assets, the effect of that decline will be magnified in the Fund because of the additional assets purchased with the proceeds of the leverage

Foreign securities are more volatile, harder to price and less liquid than U.S. securities. They are subject to different accounting and regulatory standards, and political and economic risks. These risks are enhanced in emerging markets countries. Equity stocks of small and mid-cap companies carry greater risk, and more volatility than equity stocks of larger, more established companies. Dividends are not guaranteed and a company's future ability to pay dividends may be limited.
