These figures do not include the initial charge; if this is paid it will reduce performance from that shown.

The comparator shown may be used for risk monitoring and portfolio construction purposes, as well as to provide a performance comparator; it is not an integral part of the Objective and Investment Policy for the fund and should not be considered as such.

^AThe Aberdeen Investment Funds ICVC Corporate Bond Fund was created by the transfer of the Aberdeen Investment Funds ICVC II Aberdeen Corporate Bond Fund into the Aberdeen Investments ICVC range on 17/07/2015. The historical track record shown prior to this date reflects that of the Aberdeen Investment Funds ICVC II Corporate Bond Fund.

Past performance is not a guide to future results.

Fund manager's report

October was a weak month for sterling corporate bond markets. Investment grade spreads widened for the third consecutive month, reaching two-year wides. However, total returns were positive, as underlying gilt yields fell. In corporates, cyclical sectors such as construction & materials and automobiles/parts were weak as companies reported disappointing earnings. Banks were more resilient, but more volatile areas such as subordinated insurance sold off amid market softness.

The fund underperformed its benchmark. Most stock selection losses came from the banking sector, with UK banks particularly weak. Our holdings in subordinated insurance also performed poorly. More positively, the fund has a very small position in GE, leaving it significantly underweight in the name, which underperformed dramatically after a ratings downgrade; this benefited fund performance relative to benchmark. An underweight positions in EDF 6% Perp 2026 also helped. On the other side, our holdings in Direct Line RT1 and an insurance hybrid from Axa detracted from performance. Positions in Aberdeen High Yield and Aberdeen Strategic Bond Fund also detracted.

Cash includes cash at bank, outstanding settlements, call account cash, fixed deposits, cash used as margin and profit/losses on both derivative positions and forward currency contracts. Where bonds are split rated between two or more of S&P, Moody's and Fitch, the data shown takes a more conservative approach, splitting lower. This may not be consistent with the arrangement agreed in the prospectus, which may detail taking a higher rating where there is a split. In the absence of any agency ratings an internal Fund Manager rating may be applied. The benchmark shown reflects ratings from S&P, Moody's and Fitch only. This may differ from the ratings used by the benchmark provider detailed in the prospectus.

Source: Simulated Ongoing charges Aberdeen Standard Investments as at 1 March 2018.

^bThe Ongoing Charge Figure (OCF), is the overall cost shown as a percentage of the value of the assets of the Funds. It is made up of the Annual Management Charge (AMC) of 1.00% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the Funds. The Ongoing Charges figure can help you compare the annual operating expenses of different Funds.

^cThe Distribution Yield reflects the amounts that may be expected to be distributed over the next twelve months as a percentage of the mid-market share price of the fund as at the date shown. The Underlying Yield reflects the annualised income net of expenses and known irrecoverable withholding tax of the fund (calculated in accordance with relevant accounting standards) as a percentage of the mid-market share price of the fund as at the date shown. Both yields are based on a snapshot of the portfolio on the month-end date and are not guaranteed and actual distributions received (where a share class pays distribution) may be higher or lower than the amount stated. They do not include any initial charges and Investors may be subject to tax on distributions. The Distribution Yield is higher than the Underlying Yield because a portion of the fund's expenses are charged to capital. This has the effect of increasing distributions and constraining the fund's capital performance.

Important information

Risk factors you should consider before investing:

- The value of investments and the income from them can go down as well as up and investors may get back less than the amount invested.
- Bonds: Bond valuations are affected by changes in interest rates, inflation and the creditworthiness of the bond issuer. There is a risk that a bond issuer may not be able to repay the money they borrowed nor make their required interest payments. This risk increases for bonds with lower credit ratings. Where a bond market has a low number of buyers and/or a high number of sellers, it may be harder to sell particular bonds at an anticipated price and/or in a timely manner.
- A full list of risks applicable to this Fund can be found in the Prospectus.

Other important information:

The Fund is a sub-fund of Aberdeen Investment Funds ICVC, an authorised open-ended investment company (OEIC). The Authorised Corporate Director is Aberdeen Fund Managers Limited. Nothing herein constitutes investment, legal, tax or other advice and is not to be relied upon in making an investment or other decision. No recommendation is made, positive or otherwise, regarding individual securities mentioned. This is not an invitation to subscribe for shares in the Fund and is by way of information only. Subscriptions will only be received and shares issued on the basis of the current Prospectus, relevant Key Investor Information Document (KIID) and Supplementary Information Document (SID) for the Fund. These can be obtained free of charge from Aberdeen Fund Managers Limited, PO Box 9029, Chelmsford, CM99 2WJ.

Aberdeen Standard Investments is a brand of the investment businesses of Aberdeen Asset Management and Standard Life Investments.

Issued by Aberdeen Asset Managers Limited which is authorised and regulated by the Financial Conduct Authority in the United Kingdom.
